

SEFTON TRAIN STATION

Location: Sefton Train Station, NSW, Australia
Surface Material: Composite pavers with stone aggregate
Product: **STAIN-PROOF™**
Date of completion: February 2012

THE PROJECT:

Sefton, a small residential suburb in Sydney's inner-west, is one of the stops on inner west railway line of the Sydney CityRail network. Clustered around the train station are fruit shops, pharmacies, leisure stores and several residential apartment blocks.

REQUIREMENTS:

The client had a number of special requirements for this high traffic public site:

1. Longevity – because such a high-traffic environment would lead to costly and disruptive re-application.
2. The look of the historic site had to be maintained.
3. With thousands of people using the station, slip resistance could not be compromised.
4. Sealed surfaces should be easier to maintain and clean and must withstand commercial alkaline cleaning chemicals and pressure washing.

The Dry-Treat Solution:

CityRail approved **STAIN-PROOF Original™** for all surfaces.

Because the specially designed sealing molecules in STAIN-PROOF™ are hundreds of times smaller than other penetrating sealers, the sealer works from inside the pores of the material and has little effect on slip resistance.

STAIN-PROOF's modified silane technology was designed for highly alkaline environments and the sealer also permanently bonds to the surface materials by chemical reaction, actually becoming part of the material. So STAIN-PROOF™ easily withstands strong alkaline commercial cleaners and pressure washing.

A 15 year performance warranty certificate can be supplied when STAIN-PROOF™ is applied by an Accredited Applicator.

THE APPLICATOR: **BONLINE**

Bonline Driveway & Paver Sealing Services has over 15 years experience specialising in the application of protective sealants to Commercial and Residential, old and newly laid pavers, concrete, retaining walls, internal and external flooring.

Bonline's two-fold service incorporates Steam Pressure Cleaning, Removal of Stains, Bacteria, Mould and Mildew, and the application of protective sealants to suit all types of hard flooring. Bonline also offers Anti-Slip Solutions, Anti-Graffiti Cleaning and Sealing and ongoing maintenance programs for all residential and commercial clients.
